Education

University of California, Irvine | B.S, Business Information Management, Minor in Statistics **Sep 2023 - Jun 2027**
GPA: 3.77 / 4.00 (Dean's List, all quarters)

Relevant Courses: Data Structures and Algorithms (C++), Advanced Python Programming & Databases, Advanced Java Programming, Information Retrieval, Discrete Math

Activities and Societies: Association of Computing Machinery, Phi Delta Theta, Associated Students UCI

Skills

Languages: Python, Java, C++, C#, JavaScript, TypeScript, SQL, Bash

Frameworks & Libraries: React, FastAPI, NumPy, pandas, scikit-learn, NLTK, JUnit, NUnit, Pytest

Cloud & Platforms: AWS, Azure, Google Cloud

Tools: Git, LangGraph, Google Colab

Experience

Microsoft | *Incoming 2026* Redmond, WA

Software Engineering Intern - Backend / Applied AI

Microsoft | *Python, C#, .NET, Azure OpenAI, Azure Blob Storage, FastAPI, Git* Redmond, WA

Software Engineering Intern - Backend / Applied AI Jun 2025 - Sep 2025

- Designed and deployed an anomaly-detection AI assistant in C# and Azure enabling users to interpret and visualize real-time system anomalies
- Integrated Model Context Protocol (MCP) servers with Eventhouse and Kusto Query Language (KQL) to support low-latency analytics over streaming telemetry
- Built a Microsoft Teams bot backed by REST APIs delivering summaries, interactive charts, and recommended actions via Adaptive Cards
- Resolved 10+ production bugs across backend services, improving reliability and customer-facing stability

Centific | *KEStudio, Python, Data Analysis, Technical Documentation* Redmond, WA

Technical Intern Jun 2024 - Dec 2024

- Labeled and structured 7,000+ emails to detect and fight against email threats, increasing model precision by 12%
- Analyzed key performance metrics in Microsoft Exchange Online Protection, influencing retraining and deployment
- Collaborated with Data Science and cross-functional teams to deliver technical feedback that reduced false positives by 15%

DW Quality Mortgages | *Python, pandas, NumPy, regex, BeautifulSoup (BS4)* Sammamish, WA

Software Engineering Intern Mar 2021 - Jan 2024

- Engineered a Python-based mortgage broker aggregation system scraping 15+ lender sites weekly to parse rate sheets
- Implemented pricing algorithms to identify optimal interest rates, reducing manual marketing prep time by 75%
- Established CI/CD workflows and authored pytest suites, increasing test coverage from 40% to 80%

Projects

ConceptBridge - AI Study Assistant (AWS CloudHacks Proj.) | *TypeScript, JavaScript, AWS, React*

- Developed an AI Study assistant in TypeScript that converts notes into quizzes and returns personalized feedback.
- Designed a low-latency (less than 10s) end-to-end pipeline using AWS S3, Lambda, API Gateway, and Bedrock.
- Integrated AWS Amplify (React), Google Web Speech, IAM policies, and S3 for authentication, storage, and frontend deployment

Information Analyst Search Engine (Personal Proj.) | *Python, Flask, NLTK, scikit-learn*

- Developed a custom scalable search engine capable of searching and indexing through 2,000+ pages in 2 seconds.
- Optimized indexing and query performance through efficient storage structures and improved time complexity

Leadership

UCI Donald Bren School of Information and Computer Sciences | *Python* Irvine, CA

Learning Assistant (ICS 31 - Introduction to Programming) Jan 2025 - Mar 2025

- Collaborated with course instructors to facilitate lab sections of 45 students, breaking down core Python concepts
- Helped 90% of students earn passing or excellent grades through 1:1 support and personalized guidance.
